

DevOps Engineer

About us

LDSK is an innovative technology platform helping Out-of-Home media owners revolutionize the way they connect with advertisers.

It's an exciting time to be in Out-of-Home (or Outdoor Advertising as it's sometimes known). The industry is undergoing rapid digital transformation, bringing with it new opportunities and challenges. Through intelligent automation, data analysis and optimisation, our tools are changing the way our clients – global brands like JCDecaux, Clear Channel and Global Outdoor – grow their businesses. From booking to screen, our technology emboldens them with dynamic new ways to connect with audiences in the real world, and deliver better ads for everyone.

LDSK, as we call ourselves for short, is the result of a merger between two leading technology companies, LiveDOOH and Signkick. Sharing a vision for our industry, individually, we'd developed complementary products and teams. As we charge into our next phase of growth together, we're looking for smart, driven and fun-loving people to join us.

How you'll make an impact

We're a high-performing team on a mission to build the number one media owner platform in the world.

As a key member of the Cloud Platform and Site Reliability team, you'll be working with talented, cross-functional, highly-motivated international teams, acting as a bridge between application developers and the underlying infrastructure, strengthening the DevOps culture, working with innovative technologies, and ensuring that our systems are ready for Internet scale.

What you'll be doing

POWERING SMART MEDIA OWNERS

- Participate and learn in the design, deployment, and operation of our applications
- Ensure that our applications are meeting our operation, availability, monitoring, and performance standards throughout our different environments
- Prepare Continuous Integration and Continuous Delivery pipelines
- Manage and provision cloud infrastructure as a Code tools
- Contribute on our Kubernetes orchestrated infrastructure on our cloud platforms
- Creation of automation tasks and processes
- Work together with the rest of the Infrastructure department to create the infrastructure of the future
- Design, build, and maintain our Kubernetes orchestrated infrastructure on our cloud platforms
- Automate from A to Z using for example: Terraform, Ansible, Serverless functions, etc.

The stack

- Kubernetes
- Docker
- Google Cloud, AWS, Azure
- Linux (Ubuntu, Debian)
- JetBrains TeamCity
- ArgoCD
- GitOps
- MongoDB
- PostgreSQL
- Terraform
- Ansible
- ELK stack
- Prometheus stack

What you'll need

- University degree in Computer Science or equivalent experience
- Cross platform configurations and troubleshooting (Windows, Linux)
- Cross cloud configuration and troubleshooting

POWERING SMART MEDIA OWNERS

- Good understanding of a high-traffic, distributed systems
- Knowledge of container orchestration specifically Kubernetes
- Good understanding of configuration and troubleshooting of Linux, PHP/.Net Core, Docker systems.
- Having experience in automating processes with fitting technologies like Terraform, Cloudformation, Ansible, Helm charts etc is a plus!
- Have experience with DevOps tooling like CI/CD, orchestration and monitoring
- Are good in working together with colleagues from different disciplines;
- Ability to explain large-scale complex systems from a reliability perspective
- Passion for resolving reliability issues and identify strategies to mitigate going forward
- Excellent command / highly proficient in spoken and written English

What will help

- Network and system analysis experience
- Linux system-level analysis capabilities
- Software engineering skills ideally with experience in Python and/or /C#
- Knowledge of containers and microservices
- Experience with Cloud Computing platforms
- Understanding of Agile, DevOps practices such as CI/CD, automated testing
- Experience with monitoring tools (Prometheus and Grafana) and automated alerting services
- Experience with logstash/kibana/elasticsearch

Why LDSK?

We're young, ambitious and growing fast. Our collaborative, inclusive culture is something we're immensely proud of. We support our diverse team with good career progression, training and benefits, while maintaining a healthy work/life balance.

With an international list of clients, we currently have offices in the UK, Germany and Macedonia, with more coming soon. Whatever door you step through, you'll feel welcomed, challenged and supported to do the best work of your career.

What we offer

- Market rate salary
- Cutting-edge hardware and productivity tools
- A dynamic team with kind and highly qualified colleagues
- Generous training allowance
- Career progression in an international company
- Flexible work options
- Private health insurance
- Sports benefits
- Healthy snacks, coffee and drinks
- Experienced colleagues and management
- A fun and supportive work culture
