ProtonMail

Automation QA Engineer

Location: Skopje, Macedonia
Type: Full-time
Apply: Email resume and why you are a good fit to cv@protonmail.com with "Automation QA Engineer" in subject.

Our company
ProtonMail was born at the European Organization for Nuclear Research (CERN) in 2013 when a group of scientists and engineers envisioned an email service that empowers people to own their private data and keeps them safe from mass surveillance. Since then, ProtonMail has become the world's largest secure email provider, with over 20 million users and a profitable business model. Our mission extends beyond email: we're building a better Internet through other privacy-focused services, including ProtonVPN, ProtonCalendar, and ProtonDrive. We are looking for passionate people to join our growing team and help us build an Internet that puts people's privacy first.

As a QA Engineer, you will be:
- Working closely with the development team in order to improve quality of our products
- Ensuring best testing practices are used in product development
- Designing, creating, running and maintaining manual and/or automated functional and non-functional tests
- Converting manual test cases into automated tests to support manual testing efforts
- Automating tests for different systems and devices (Android, iOS, MacOS, Windows, web applications and etc.)
- Developing a test strategy for web and mobile products
- Taking part into review of feature specifications and wireframes

Job Requirements
- Be independent and be capable to teach yourself
- Eager to share knowledge and try new things
- Be quality results oriented
- Strong knowledge of quality assurance methodologies, tools and processes
- Solid understanding of software development life-cycle process
- Experience with Selenium Webdriver or alternatives (e.g. Cypress.io)
- Knowledge of API testing tools (e.g. Postman, Fiddler or Charles Proxy)
- Experience in API and UI test automation

Bonus points for:
- Understanding networking concepts
- Experience in mobile testing is an advantage
- API framework (e.g. Rest API)
- Security tools: OWASP ZAP

Why work at ProtonMail?

- A friendly and casual office environment
- A dedicated office budget that can be used for gym memberships, buying snacks for the office, public parking or professional development
- We work on interesting, challenging problems. Each day you will face a new issue, and there is never a dull moment
- Our rapid growth means there are many opportunities for advancement
- Do something meaningful. ProtonMail protects dissidents, journalists, and activists. Our work saves lives
- Be part of something bigger. Millions of people and businesses around the world have embraced our idea of an Internet where privacy and security are the default. Join the privacy revolution that is changing the world
