Where we are

Full truck load

Thanks to a fleet of 600 trucks and 1500 semitrailers, Codognotto Group is always able to offer a solution for road transport independently to destinations and specific cargo requirements.

Intermodality

Making sustainable intermodality is a challenge that has been taken by Codognotto activating new services and testing new routes.

The Group offers the knowledge with the aim to match the distance between quotation and enquiries which requires know how about different modes of transport **road, rail, air, sea**

Railway routes opened in 2014/2015:

- Piacenza – Pomezia
- Torino – Lyon
- Gliwice – Piacenza
- Milano – Catania
- Novara - Middlesbrough

There are no places in the world that our division devoted to Air&Ocean and its network cannot reach. It manages transport services with the most innovative solutions both overseas and air. The division manages 1.000.000 kgs through air and 20.000 teus by sea every year).

Offered services:

- Full container Load (FCL)
- Less container Load (LCL)
- 20' box – 40' box – 40' high cube
- 20'/40' OpenTop – HardTop
- Reefer - Flat Rack
- Break Bulk

Air:

Every week shipping service
BackToBack Malpensa/Shanghai;
Malpensa/Bombay;
Malpensa/Viracopos;
Malpensa/H.Kong; Malpensa/Mex

Value Added Services

- Warehousing
- VAT Warehousing
- Customs counseling
- Supply Chain management

Codognotto Group, thanks to its experience in Full Truck Load, has implemented in parallel groupage services maintaining the same flexibility and reliability in the services. The groupage is then operated with the aid of a matching network that support the Group structures in operations such as:

- Goods collection;
- Consolidation HUBs;
- Transport and Distribution.

The widespread presence in Europe allows the Group to offer the most suitable distribution service to the specific needs of B2B customers with over 600 shipments per day.

AUSTRIA , FRANCE , GERMANY , NORWAY , THE NETHERLANDS , POLAND , PORTUGAL , CZECH REPUBLIC ,
ROMANIA , RUSSIA , SLOVAKIA , SLOVENIA , SPAIN , SWEDEN , SWITZERLAND , TURKEY , UNITED KINGDOM
AND HUNGARY

Warehousing

Codognotto Group has managed warehouses activities since 2010 in order to start an integration process with transport, its core business. Since 2015 specific investments has been driven in Contract Logistics considerably improving the know how and facilities of Codognotto team which can now provide 3rd and 4th party logistics services. In less then two years, warehouses has swapped an area of 80 m2 to 130 m2 offering the most advanced logistics services of the market:

- Integrated management of logistics flows;
- Constant process optimization;
- Vertical competences from industrial to e-commerce passing through retail and furniture;
- Added value services studied on clients' needs;

Owned warehouses in **Slovenia, Italy** and **United Kingdom** for a total area of **130,000 m2**.

Lead logistics

Globalization requires a better integration of freight flows, processes and different suppliers. Codognotto supports its major clients in planning daily operations, to better plan and schedule freight flows, manage and control information.

This knowledge drives to specific services such as:

- Logistics network design necessary for the complete management of the supply chain providing optimum levels of service, efficiency and flexibility;
- Partner selection for the implementation of every specific project thanks to a deep knowledge of the sector and buying power;
- Research, planning and execution in order to look for the most advanced solutions for a continuous improvement of processes and procedures
- Supply chain management through an accurate processing of information flows

Certifications

"ISO 9001" Quality Management System

"ISO 14001" Environmental Management

"OHSAS 18001" Occupational Health and Safety

Carbon Footprint "ISO 14064"

Fleet innovation and drivers training

- Codognotto's 600 trucks average age is five years;
- Since two years all the trucks are bought with a buyback agreement after three years;
- Today, most of the trucks comply with Euro 6 standards.

New technologies have been applied to the trucks in order to optimize the traffic flows and reduce the environmental impact and training pathways declined for the drivers:

- Trucks are equipped with the latest satellite systems which allows the optimization of routes and reduction of empty kilometres;
- New equipment (250 units) is equipped with Tyre Pressure Monitoring System and tyres with decreasing routable consumption (expected emissions lower than 5%);
- Training on Eco-driving is always ongoing.

Alternative fuels

Alternative fuels can be a positive answers to the question **“how can we make more sustainable road transport?”**.

Codognotto is one of the player that has decided to invest on LNG in order to face and tear down the barriers that today limit the large scale deployment:

- Lack of refueling stations;
- Technologies still not proper efficient;
- Lack of a dedicated legislation;
- Low price of traditional fuels.

Self-improvement

The most important innovation is the one we can get working on ourselves and our limits. The company is always looking for its self-improvement.

Currently several internal innovation processes are ongoing:

- Training on continuous improvement strategies;
- A new TMS has been introduced for all Group allowing a faster and easier planning and tracking of deliveries;
- Innovation department working on the promotion of innovation and culture in the transport sector (Codognotto is key partner of a master class in transport and logistics and co-founder of a two years course for high school students).
