

Junior D365 CE Consultant

Are you fascinated by the latest technologies? Ready to be part of an international team? Eager to work with Microsoft's state-of-the-art solution for Customer Experience within Power Platform & Dynamics 365?

As a junior consultant, you will work with the latest Microsoft technologies to configure the MECOMS solution & build modifications and integrations, leveraging Microsoft's Power Platform & D365, to meet the needs of the customer.

Your main tasks and responsibilities (which will be adapted to your level of experience and skills):

- Work with a variety of the latest software to build, test & release modifications & powerapps: C#, Javascript/Typescript, MS Dynamics 365, Power Platform, ...
- Work on an Azure based platform, with the latest Microsoft applications on a fast-changing platform
- Read & understand technical design documents
- Develop, configure, test & release modifications, extensions & system integrations
- Clear pending issues with the application consultant (mostly remote) in an efficient way

You have:

- A university or bachelor's degree in (applied) informatics, electronica/ICT, computer science or equivalent
- Very good knowledge of English
- Experience in D365, C#, Javascript, ASP.Net MVC, HTML5, CSS or Angular is a plus
- Experience in test-driven development & automated builds with Azure DevOps is a plus

You are:

- A dynamic team player with great sense of responsibility
- A strong communicator, face to face and remote/online
- Very eager to learn new technologies & to work on a diversity of domains and tasks: configuration, front-end & back-end development
- An independent problem solver who likes to find creative solutions
- Looking for a role where you can grow fast and see quick results of your work
- Goal-oriented, with an eye for quality

We offer

- A personal coach and, after positive evaluation of your internship, a contract to become a full time employee
- Deep dive training by our MECOMS knowledge center
- The possibility to work with the latest technologies and stay up to date with the latest changes
- A team culture that is based on trust and where continuous growth is naturally encouraged
- Real career opportunities: do you want to become an expert or rather grow towards an international functional role, that's up to you!
- If you like to travel abroad, we can offer you international projects to work on once you have the right level of experience and skills

About us

MECOMS is an ERP solution for energy and utility companies, based on Microsoft Dynamics 365. MECOMS is the result of 40 years of experience in the utility industry, and is rapidly expanding its footprint on an international scale.

MECOMS is Microsoft's recommended solution for energy and utility companies across the globe. In only a few years MECOMS has grown into a major international challenger, recognized by industry analysts, such as Gartner, IDC and OVUM. Major software integrators, such as Avanade/Accenture, GMCS and CGI have partnered with us and offer MECOMS as preferred solution for energy and utility companies.

MECOMS is used by clients worldwide and located in Belgium (Antwerp), UK (Manchester), North Macedonia (Skopje) and Singapore. Close cooperation and knowledge building with a local partner in North Macedonia (Skopje) since 10 years provided MECOMS with a solid base to expand their activities in the Skopje office.
