

Senior .NET Engineer

About us

LiveDOOH Signkick is an innovative technology platform helping Out-of-Home media owners revolutionize the way they connect with advertisers.

It's an exciting time to be in Out-of-Home (or Outdoor Advertising as it's sometimes known). The industry is undergoing rapid digital transformation, bringing with it new opportunities and challenges. Through intelligent automation, data analysis and optimisation, our tools are changing the way our clients – global brands like JCDecaux, Clear Channel and Global Outdoor – grow their businesses. From booking to screen, our technology emboldens them with dynamic new ways to connect with audiences in the real world, and deliver better ads for everyone.

LDSK, as we call ourselves for short, is the result of a merger between two leading technology companies, LiveDOOH and Signkick. Sharing a vision for our industry, individually, we'd developed complementary products and teams. As we charge into our next phase of growth together, we're looking for smart, driven and fun-loving people to join us.

How You'll Make an Impact

Join our top-performing team on a mission to create the leading media owner platform globally.

As a vital part of the Software Engineering team, you'll contribute to the ongoing enhancement of our cloud platform. We're looking for a self-motivated engineer with a sharp eye for detail, who can think creatively and work dynamically. You'll use the latest web and backend technologies to provide our customers with an outstanding user experience, and you should bring a passion for crafting high-quality software.

What You'll Be Doing

- Design, develop, test, maintain, and improve software with technical excellence.
- Work with the design team to implement front-end applications that are both functional and visually appealing.
- Handle full-stack development tasks, including user interface design, REST API integration, database management, and optimizing search and post-processing operations.
- Explore and introduce new technologies to enhance our products.
- Assist the product management team by providing innovative ideas and solutions for new features.
- Develop and run automated tests to ensure software quality.
- Interpret business needs into efficient RESTful operations.
- Implement tailored integrations for our customers.
- Show initiative and leadership in creating technical solutions.

What you'll need

- University degree in computer science, or equivalent industry experience
- Professional working experience as software development engineer, ideally in an agile development process
- 4+ years of experience in the development and design of high-quality software (Object-Oriented, Clean-Code, Design Patterns, SOLID, Design-Driven Development)
- Experience in software development using C# and .NET Core
- Practical experience with a major cloud computing service
- Excellent command / highly proficient in spoken and written English
- Experience with database systems, relational and document-based, such as MongoDB, PostgreSQL, big data
- Experience with some of the following: RabbitMQ, Kafka, Apache Spark, ElasticSearch and Kibana
- Understanding Continuous Integration and Continuous Deployment processes and supporting tools like TeamCity or Github Actions
- Familiarity with Docker and containerization technologies such as Kubernetes is a big advantage

- Familiarity with web based applications and micro services architecture
- A team player, independent, assertive and professional

What will help

- Knowledge of complex software algorithms
- Experience in front-end frameworks such as: Angular, React, JavaScript, TypeScript or similar
- Great troubleshooting skills
- Self-motivated learner, quick to research and implement new technologies and tools
- Experience with high performance media playback development (video, images, dynamic HTML5) is a big plus
- Familiarity with big data applications and data streaming architecture - advantage

Why LDSK?

We're young, ambitious and growing fast. Our collaborative, inclusive culture is something we're immensely proud of. We support our diverse team with good career progression, training and benefits, while maintaining a healthy work/life balance.

With an international list of clients, we currently have offices in the UK, Germany and Macedonia, with more coming soon. Whatever door you step through, you'll feel welcomed, challenged and supported to do the best work of your career.

What we offer

- Market rate salary
- Hybrid remote work is possible
- Cutting-edge hardware and productivity tools
- A dynamic team with kind and highly qualified colleagues
- Generous training allowance

- Career progression in an international company
- Flexible work options
- Private health insurance
- Sports benefits
- Healthy snacks, coffee and drinks
- Experienced colleagues and management
- A fun and supportive work culture
