[Synapse - Digital Agency](#) is looking for a rockstar Frontend Developer

You will be working on a variety of projects from WordPress websites to web applications.

There is always something new and exciting!

Overview

We are seeking a front-end web developer to join our team. Qualified candidates will be expected to have a working knowledge of HTML5, CSS, and JavaScript and a basic understanding of user interface and user experience (UI/UX) design, and basic knowledge of WordPress.

Your duties will include turning wireframes and mock-ups into reusable code and building high-quality UI components with scalability in mind. You will also be responsible for implementing new features to our WordPress website, handling the integration of plugins such as WooCommerce, and performing routine maintenance and performance optimizations.

Responsibilities

- Build web applications with web development best practices
- Transform app designs into front-end code with HTML, CSS, and JavaScript
- Work with back-end developers to integrate UI components with APIs and databases
- Gather and refine specifications and requirements based on technical requirements or UX design
- Debug errors, troubleshoot issues and perform routine performance optimizations
- Write high-quality, scalable, and reusable code
- Stay plugged into emerging technologies and industry trends
- Job Qualifications and Skill Sets

Qualifications

- Bachelor's degree in computer science or a related field
- Minimum of 2 years of experience developing modern, responsive, and cross-browser-compatible websites using HTML, CSS, and JavaScript
- Experience with JavaScript libraries such as jQuery and Bootstrap
- Proficiency with HTML5
- Basic proficiency with Adobe XD and Photoshop
- Experience with cross-browser compatibility testing
