POWERING SMART MEDIA OWNERS

Software Quality Assurance Specialist

About us

LiveDOOH Signkick is an innovative technology platform helping Out-of-Home media owners revolutionize the way they connect with advertisers.
It's an exciting time to be in Out-of-Home (or Outdoor Advertising as it's sometimes known). The industry is undergoing rapid digital transformation, bringing with it new opportunities and challenges. Through intelligent automation, data analysis and optimisation, our tools are changing the way our clients – global brands like JCDecaux, Clear Channel and Global Outdoor – grow their businesses. From booking to screen, our technology emboldens them with dynamic new ways to connect with audiences in the real world, and deliver better ads for everyone.

LDSK, as we call ourselves for short, is the result of a merger between two leading technology companies, LiveDOOH and Signkick. Sharing a vision for our industry, individually, we'd developed complementary products and teams. As we charge into our next phase of growth together, we're looking for smart, driven and fun-loving people to join us.

How you'll make an impact

We're a high-performing team on a mission to build the number one media owner platform in the world.

As a key member of the Quality Assurance team, you'll be working with us on the continuous development of our cloud platform. You are used to working self-motivated, attention to detail driven, think outside the box and act agile. You are interested in using cutting edge dynamic web technologies to give our customers the best user experience. Ideally you also have a passion for quality software.

What you'll be doing

- Define and implement test cases for different software components
- Extend and maintain current test case collections
- Communicate daily with development and product management teams
- Support in the improvement of test processes
- Elaborate test results documentations
- Writing automation tests with one of our automation framework Protractor and Cypress
- Review PR's from automation tests
- Maintain automation builds on server

What you'll need

- University degree in Computer Science or equivalent experience
- Excellent command / highly proficient in spoken and written English
- Other language skills are a plus
- Ability to work independently and in a team
- Understanding of object-oriented programming languages
- Writing manual test cases in tools such as Cucumber Studio, TestRail, etc.
- Performs quality review of the technical documentation, test documentation, automated tests, understands the code.
- Experience with automation tools such as Selenium WebDriver, Geb, Mocha, Protractor, Cypress, etc.

What will help

Optional: Experience with..
- JIRA and Confluence
- Performance/Load/Stress testing
- Creating scripts in Bash, Javascript/Typescript or Python. This is a big plus
- Working in a Scrum team
- Basic understanding of Linux file system and system logs
- Experience working with Postman
