

Supply Chain Strategy Manager- Logistics center in Skopje office

Role and responsibilities:

- Support MP&L Innovation, Strategy, Leadership & Vision to enhance supply chain performance.
- Implement internal strategic supply chain designs and playbooks to meet customer needs.
- Stay updated at market and technology trends for translating them into potential internal deployments.
- Strategically manage the coordination of supply chain projects from its early phase until final deployment into operation sites.
- Drive continuous improvement and process optimization.
- Support and promote collaboration with universities and colleges for ensuring talent acquisition.
- Ensure MP&L and Industry 4.0 principles are basics for all running projects.
- Driving seamless deployments with no materials related disruptions.
- Develop skills and leadership always in the merge of supply operations and business analytics.
- Facilitate reports and business analytics tools for supply and production processes.
- Own responsibilities over any supply, materials, transport procurement and systems related projects within the organization.

Technical Skills & Qualifications:

- Solid Supply Chain experience, ideally in the automotive sector.
- A university degree in Engineering, Business, Logistics, IT or a related field.
- Proficiency in English; additional language skills are advantageous.
- Expertise in systems and ERP.
- Understanding of databases.
- Strong project management skills.
- Ability to develop processes and procedures.
- Negotiation skills.
- Knowledge of contractual and legal aspects (preferred).
- Enthusiasm for transformation projects.
- Long-term strategic vision.
- Effective communication abilities.
- Proactive approach to tasks.
- Eagerness for personal and professional growth.
