To join our international team at the earliest possible date.

Main tasks and responsibilities:

- Developing financial software following established standards and best practices by using .NET technology in Azure environment
- Analyzing and understanding a whole solution, with the interfaces and dependencies between the technical components
- Designing a technical solution based on business requirements defined by our customers
- Implementation of software solution in accordance with company standards and policies
- Continuous improvement of technical and business/financial knowledge

Requirements & attributes:

- Bachelor in Computer Science or Information Science
- .NET development experience with C#
- Experience with automated test and continuous integration
- Demonstrate complex problem solving, critical thinking, and decision-making
- Ability to design and document complete solutions
- Demonstrate flexibility and adaptability to ambiguity
- Demonstrate strong written, verbal, and interpersonal communications skills
- Demonstrate attention to detail and time management skills
- Experience with SQL Server and/or Azure and development of enterprise level N-tier solutions is considered as advantage
- Knowledge of banking business is a plus

Our offer:

- A substantial degree of flexibility, allowing for an autonomous approach to performing duties
- Challenging and varied work
- Flat management structure
- Long-term prospects with plenty of opportunities for professional development and growth
- Excellent team-oriented and international working environment
